**JLK Tower, 129 12 Floor Khwaeng  
Khlong Toei Nuea, Watthana, Bangkok  
10110, Thailand, Bangkok, 10110,  
Thailand**

### JLK Tower is a WiredScore Platinum building

Being a WiredScore Platinum building means that JLK Tower can support occupiers with the most stringent technology requirements. The building has been designed as best-in-class across all features of connectivity that matter most to occupiers: number and quality of internet service providers; diversity and resiliency of telecommunications and power infrastructure; wireless network infrastructure; ease of installation and capacity to readily support new telecommunications services.

## An overview of the experience at JLK Tower

Category	Your experience at JLK Tower	Regular building experience
 Mobile and Internet	Enjoy unparalleled digital connectivity with top-tier internet providers, powered by robust fiber infrastructure for the ultimate online experience throughout the building.	Expect frustrating interruptions and dead zones as you move throughout the building due to patchy digital connectivity.
 Set-up	Enjoy seamless and effortless internet setup with multiple high-speed providers at your fingertips with streamlined legal contracting. Ensuring you easily find the perfect match for your needs and enjoy a smooth, hassle-free digital experience.	Experience a tedious and slow process to setup your internet connection.
 Future-ready	To meet your needs well into the future, the building is equipped with ample spare capacity throughout, including the risers, points of entry and telecommunications rooms. This ensures the building can accommodate new and emerging technologies, providing you with the flexibility and adaptability you require.	Risk future problems arising from an internet connection and mobile connectivity that can't keep up with your growing needs.
 Resiliency	The building's robust infrastructure, including multiple entry points and diverse and secure risers and telecommunications rooms, mitigates against almost all risks to uninterrupted connectivity.	Experience frequent productivity loss and general frustration resulting from your vulnerable, and poorly secured internet infrastructure.

## Connected building highlights at JLK Tower

### Mobile and Internet

- Strong mobile signal from at least one mobile operator means your calls don't drop.
- Easily install fixed wireless, satellite and mobile equipment with dedicated space and cable pathways to risers on the rooftop.

### Set-up

- Install times are minimised with ISP connection points present across the floors of the building.
- Easier service installation enabled by spare capacity within the below-ground telecommunications cable pathway.
- Secure access to risers on each floor prevents unauthorized access and accelerates the installation of connectivity services.
- Protected routing enabled by a top-to-bottom riser expedites the installation process.
- Capacity in risers enables fast installations of new connectivity services.

### Future-ready

- New internet service providers can be installed quickly with available space in the telecommunications room.
- Signed ISP agreements are available to streamline new connections.
- A dedicated fiber backbone eases telecommunications installations.

### Resiliency

- Physically diverse routes for your internet connection on different sides of the building means your connectivity is robust.
- Your connection is safeguarded by a secure and dedicated telecommunications room.
- A climate controlled telecommunication room protects your equipment from overheating and condensation.
- Connectivity infrastructure in the telecommunications room is protected from flooding and leaks.
- An audit of the telecommunications installation verifies best practices are followed.

## What are the Internet service providers (ISP) within the building?

Name of provider	Provider type	Intake	Location	Riser	Full distribution
AWN	Fiber - Primary	Unconfirmed	ISP Room	Riser 1	No
Interlink	Fiber - Primary	Unconfirmed	ISP Room	Unconfirmed	No
Symphony	Fiber - Primary	Unconfirmed	ISP Room	Unconfirmed	No
True	Fiber - Primary	Unconfirmed	ISP Room	Unconfirmed	No
NT	Fiber - Primary	Unconfirmed	ISP Room	Unconfirmed	No

## What are the Mobile operators within the building?

Name of provider	Performance	Source	Additional areas covered	5G ready
AWN	Good	In-building solution	Yes	No

## What is WiredScore?

WiredScore certification is the global standard for digital connectivity, recognizing and promoting best-in-class digitally connected buildings across the globe. Being certified by WiredScore demonstrates the building has gone through rigorous 3rd party verification.
